## Company profile

\*\*\*\*\*

We introduce ourselves as M/s. Shanti Agro Products. We are located at Navsari, Gujarat. Our companies profile is as under.

We manufacture Zinc Sulphate Monohydrate (fertilizer grade) and Copper Sulphate. Zinc Sulphate Monohydrate manufactured by us has minimum Zinc of 33% Guaranteed. Our Production capacity of Zinc Sulphate Monohydrate (fertilizer grade) is approx. 8000 MT per annum and for copper sulphate is 120 MT per annum.

The company is in production since 2004 and since then we are supplying to our distributors as well as to the end users and government supply (under subsidy) all over India. through our parties.

Zinc Sulphate Monohydrate (fertilizer grade) is used regularly by farmers all over India. Our material is also used as raw material in the manufacture of micro-nutrient and also in Fish and poultry feed and cattle feed.

Our product Zinc Sulphate Monohydrate (fertilizer grade) is used by companies like Gujarat State Fertilizer co. Mangloare Chemicals and Fertilizers Ltd, Crystal Phosphate, Shivashakthi Bio Plantteec ,Aries Agro limited many more

We have a fully developed laboratory and developed all necessary methods of testing according to ISI and government approved methods.

Company has obtained all necessary licenses from various departments like.....

- \*Gujarat Pollution Control Board.
- \*Fertilizer License from Agricultural Department.
- \*Import Export Code.
- \*SSI Registration and etc.

The agricultural department has found lot of deficiency of zinc in the agricultural land in India. There is no other way except using Zinc Sulphate Monohydrate (fertilizer grade) in the farms to fulfill the deficiency of zinc. which is a main nutrient for the growth and health of the plant . hence it increase the production of crops.
